<b>Easy fix?:</b>	Yes	
<b>Description</b>		
<p>The DB-Manager for PostGIS does not show Foreign Tables in a PostGIS database schema. Normal Tables, Views and Materialized Views are shown, but Foreign Tables are ignored.</p> <p>However, i can load the Foreign Table into QGIS using the SQL-Window - tab and loading it using</p> <pre>SELECT * FROM myschema.my_foreign_table</pre> <p>It would be nice if the DB-Manager could show Foreign Tables in the project tree.</p>
