Description

Today, I updated my QGIS sandbox and tried to do complete rebuild.
I got following error and compilation stopped:

    qgsmaplayerset.cpp: In member function 'void [[QgsMapLayerSet]]::updateFullExtent()':
    qgsmaplayerset.cpp:63: error: 'string' was not declared in this scope

I've forgot to provide version of my compiler:

mloskot:~$ gcc --version
gcc (GCC) 4.0.3 (Ubuntu 4.0.3-1ubuntu5)

installed from official Ubuntu 6.06 packages.

#2 - 2006-07-21 09:05 AM - Mateusz Loskot -

By the way, I see that qgsmaplayerset.cpp file has not set svn:keywords property so Id keyword is not expanded.

#3 - 2006-07-23 02:57 PM - Gavin Macaulay -

- *Resolution set to fixed*
- *Status changed from Open to Closed*

Applied in SVN .
