QGIS Application - Bug report #20215
Coordinate widget on status bar doesn't display whole numbers

2018-10-25 06:42 PM - Vedran Stojnovic

Status:	Open			
Priority:	Low

Category:	GUI			
Affected QGIS version:	3.2.3	**Regression?:**	No	
Operating System:	Kubuntu 18.04	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	28036	

Description

Coordinate widget frame is not displaying all digits properly (first digit is partially hidden). QGIS is in fullscreen on 22" monitor (1680x1050), so there should be plenty of space for everything. Maybe some widgets should be moved to another toolbar/location (maybe magnifier and rotation) if there is no place.

I would also like to propose a feature - to add a setting for fixed number of decimal places for coordinates display, it is very important for geodesists. In attachment there is a picture how it's solved in DraftSight CAD software.

History

#1 - 2018-10-25 11:53 PM - Vedran Stojnovic

I have found option to get fixed number of decimal places for coordinates display - it's inside project properites, but there is still a problem with visibility.
