

## QGIS Application - Bug report #20251

### virtual fields can't be filtered

2018-10-29 02:30 AM - Tobias Wendorff

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Virtual Fields	
<b>Affected QGIS version:</b>	3.5(master)	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 28072
<b>Description</b>		
<p>After creating a virtual field with \$area (float), it's not possible to filter on this variable - they don't appear on the list. It works for normal variables.</p> <p>I don't know if this is a bug or a missing feature (perhaps you can select those fields by virtual layers only?).</p>		

#### History

##### #1 - 2018-10-29 09:58 PM - Giovanni Manghi

- Operating System deleted (Microsoft Windows 7, 64-bit)
- Category changed from Unknown to Virtual Fields

##### #2 - 2019-02-05 04:43 AM - Tobias Wendorff

- Affected QGIS version changed from 3.4.0 to 3.5(master)

This is still a bug on 3.5.0-Master, revision 9a8c0d2898
