

QGIS Application - Bug report #2026

Oracle connection fails

2009-10-22 02:27 AM - HansV -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 12086
Description		
Connection to Oracle fails. Dialog: "Create a New OGR Database connection" I entered Host, Database, Port, Username and Password Then "Test connection" replies: ORA-12154: TNS:could not resolve the connect identifier specified in <unnamed> And after hitting the OK button: Invalid Data Source OCI:Username/Password@Host/Database is not a valid or recognized data source Even when I leave Host empty, I get an error because the slash is still in front of Database. What are the steps to make the Oracle connection work?
