

QGIS Application - Bug report #20292

Project which are saved with special characters in the filename and with the qgz extension are blank

2018-10-31 09:23 AM - jd lom

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	3.4.3	Regression?: No
Operating System:	Windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28113
Description		
<p>Hi,</p> <p>I know it's not a best practice (no space and no special character in filename) but some user does it.</p> <p>When reopening this project, the project is blank.</p> <p>Whis the .qgs extension, the project is opening normally.</p> <p>Only tested on windows.</p>		

History

#1 - 2019-01-10 08:25 AM - magerlin -

I have same experience:

<http://osgeo-org.1560.x6.nabble.com/QGIS-Developer-Sometimes-qgz-files-opens-just-as-a-completely-blank-project-t5389126.html#a5391011>. I can save the blank looking project as a new qgz file with an Ascii-only name and when I reopen this qgz file content is back.

#2 - 2019-01-10 11:08 AM - Giovanni Manghi

- Affected QGIS version changed from 3.4.0 to 3.4.3
