

QGIS Application - Bug report #20303

Status bar font size

2018-10-31 09:25 PM - Nathan Saylor

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	3.4.0	Regression?: Yes
Operating System:	Windows, Mint	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: wontfix
Crashes QGIS or corrupts data:	No	Copied to github as #: 28124
Description		
Status bar font size does not initially match the set font size in Settings>Options>General>Font Size. Changing this value, restarting, changing back, restarting gets it back to it's normal self okay, but shouldn't be necessary to begin with. Had this on multiple OS platforms.

Hi, I was very glad to see the statusbar info finally be readable, I'll attach what CURRENT master looks like, on background is Windows, on Top is Linux.

On windows it is in 3.4.0 very tiny, but that is fixed.

I think it looks actually better much better then earlier.

If I'm correct the actual commit was actually fixing an condition which was never reached (aka current situation is what it should look like :-))

#2 - 2018-11-01 07:28 AM - Nyal Dawson

- Resolution set to wontfix

- Status changed from Open to Closed

Yes - this is by design.
