

QGIS Application - Bug report #20338

Can not scroll through attribute list in dialog window when linking existing child features

2018-11-02 08:15 PM - Andrew Fleming

Status:	Closed	
Priority:	Normal	
Assignee:	Alessandro Pasotti	
Category:	Forms	
Affected QGIS version:	3.4.0	Regression?: No
Operating System:	Windows 7	Easy fix?: No
Pull Request or Patch applied:	Yes	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28159
Description		
<p>Hello,</p> <p>I have created a Relation between two tables in my Oracle database and am having trouble linking the parent and child features together. When I attempt to link the child to the parent using the icon in Attribute form (See "No Scroll Bar 1.jpg"), I have no way of scrolling down to the bottom of the Dialog window to confirm the link (the child table has 42 columns and I don't want to remove any of them) (See "No Scroll Bar 2.jpg").</p> <p>Also, on a side note, resizing the dialog window doesn't appear to work properly either, click-and-drag on the top of the window shifts the entire panel and doesn't actually resize.</p> <p>I'm hoping someone can help me.</p> <p>Thanks, Andrew</p>

| | *No, this behaves exactly the same in 2.18.*

#3 - 2018-11-02 09:52 PM - Alessandro Pasotti

I think that's a problem with the form window height, we should set a maximum.

@Andrew, the patch has been merged, can you please test it?

#9 - 2018-11-06 04:39 PM - Andrew Fleming

| *Thanks Alessandro,*

Unfortunately the issue remains, I can not scroll down to the bottom of the 'Dialog' window or resize it.

I just updated my QGIS to V.3.4.1 perhaps this could be the reason?

#10 - 2018-11-06 08:55 PM - Alessandro Pasotti

It's not in 3.4.1, you have to test the nightly builds.
