

QGIS Application - Feature request #20383
make label and ticks rotation possible in print layout

2018-11-06 02:36 PM - Loïc Bfr

Status:	Open	Resolution: Copied to github as #: 28203
Priority:	Normal	
Assignee:

Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>It would be really nice to make possible grid coordinate labels rotation in print layout, synchronising with map rotation factor for example. Reading a map rotated with crosses rotated but with ticks and coordinates only vertical or horizontal could become a hard job when there is a lot of information already on the map.</p>
