QGIS Application - Bug report #2039
Can't drag a file into the layer manager to add a layer

2009-10-27 09:37 PM - Alister Hood

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	GUI			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	worksforme	
Crashes QGIS or corrupts data:		**Copied to github as #:**	12099	

Description

When I try to drag-and-drop a file (e.g. a shape file or a Mapinfo tab file) into the layer manager I get the message "The layer is not a valid layer and can not be added to the map". This makes it seem like I should be able to drag files in... but for some reason it doesn't work.

History

#1 - 2009-11-29 07:33 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

Dragging and dropping both vectors (shapes) and rasters into the legend works for me under both linux and windows with qgis trunk.
