

QGIS Application - Feature request #20390

Add the "Select an input band for output" parameter to GDAL translate

2018-11-07 02:17 AM - Nicolas Cadieux

Status:	Open	Resolution: Copied to github as #: 28210
Priority:	Normal	
Assignee:	Giovanni Manghi	
Category:	Processing/GDAL	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>There is no "out format field" (-of format) in Gdal Translate. Currently, the output format is guessed from the file extension (not obvious for someone used to working at the command line) and a single format is applied by default to all output files.</p> <p>Additional fields like -b band would be very nice to have. Since there are many possible parameters, perhaps an open parameter field would be helpful for this and other gdal tools.</p> <p>https://www.gdal.org/gdal_translate.html</p>

No problem adding the -b flag or others. Regarding the output format: is by Processing design, we output a specific format for temporary outputs (gpkg or tiff by default) or the format is defined when choosing to save the output to a specific location, so is pointless adding the -of parameter.

#2 - 2019-03-11 01:55 PM - Giovanni Manghi

- Subject changed from Missing parameters in GDAL Translate to Add the "Select an input band for output" parameter to GDAL translate

#3 - 2019-03-11 02:40 PM - Giovanni Manghi
