Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	3.7(master)	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 28222
Description On Windows 7 64 bit a temporary folder (name like QGIS3-plVhju) and a temporary file (name like QGIS3.FVdPpz) are created in the user temp directory (usually C:\Users\...\AppData\Local\Temp) upon every start of QGIS. When QGIS is closed, the temporary folder and file are not deleted from the temp directory. The same happens when crssync.exe is executed after the install of a new QGIS version (crssync-vYfrXP - crssync.pVouJf) [https://trac.osgeo.org/osgeo4w/ticket/583]
