Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	28276

Description

Hi
My students has found an unexplainable error...Not only one but selveral students.

While digitizing in a project with point, line and polygon layers in the same Geopackage. The often check for illegal geometries. No problems, but the can see green corsses in the map window and in the Print Layout.
See attached image.
I can´t narrow thw problems to any specific error.. but it´s annoing :-)

Can you attach a sample project + gpkg? thanks.

#2 - 2018-11-12 01:44 PM - Lene Fischer

Try to find the projects - can´t remember which of the students...
