

QGIS Application - Feature request #20464

A new vector layer form widget: Option row

2018-11-12 02:00 PM - An Ni

Status:	Open	Resolution: Copied to github as #: 28284
Priority:	Normal	
Assignee:		
Category:	Forms	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>It would, in many cases, be more convenient to choose from an option row instead of from a drop down list (value map).</p> <p>This would be faster (one click less) and easier (easier to hit a "button" than a row in a list) to choose an option - especially when working on a field tablet with a pen (or finger) on a touch screen.</p> <p>I'm looking for a solution like the one in IntraMaps Roam ([https://github.com/DMS-Aus/Roam]) developed by Nathan Woodrow, [https://roam-docs.readthedocs.io/en/latest/admin-guide/widgettypes/#option-row]).</p> <p>Thanks!</p>
