

QGIS Application - Bug report #2049

Choosing Move Item Content in the print composer override Lock Layers

2009-11-05 04:46 AM - Luca Casagrande

Status:	Closed	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:		
Affected QGIS version:		Regression?: No
Operating System: Debian		Easy fix?: No
Pull Request or Patch supplied:		Resolution: wontfix
Crashes QGIS or corrupts data:		Copied to github as #: 12109
Description		
Hello folks:		
<ul style="list-style-type: none">- Add the vector data attached to the ticket- Choose Unique Value Style- Create a new printer composer instance, add the map and set Lock Layers On- Back to Qgis and change the style of the layer to anything and add it to the print composer- Qgis is fine and the two maps have got different style- From the composer toolbar choose "Move Item Content" and click on the first map (the one with the Lock On)- After moving the map the style change as the Lock is Off.

- Status changed from Open to Closed

This is intended. 'Lock layers' means only to lock the layers displayed in a composer map, not their appearance.

Common use-case is this: you have 10 layers, but like to only display 2 of them in an overview map. So you set the 2 layers visible, add a composer map (as overview), select 'lock layers'. Then you go back to main map, set all 10 visible and add a second composer map in composer. Like that, you can have 2 composer maps displaying different layer sets (not layer styles).
