

QGIS Application - Bug report #20508

Screen Freezes when moving window associated with QGIS

2018-11-15 04:48 PM - Kyle Somerville

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	3.4.1	Regression?: No
Operating System:	Windows 10 X64	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28328
Description		
<p>Version 3.4.1 (but was previously observed with 3.2), Windows 10 64 bit - frequently when moving (dragging) the QGIS main window, or an application window (process, plugin etc) within QGIS the screen freezes and computer is unresponsive. Workaround is CTRL+ALT+DEL and cancel, which reverts the QGIS window to where it was before the freeze, and the system continues. No data loss observed, no crash that would produce a crash report.</p>
