QGIS Application - Feature request #20512
Access to raster attribute tables

2018-11-16 01:30 AM - Katia Vila

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Rasters			
Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Easy fix?:	No		**Copied to github as #:**	28332

Description

Many categorical raster datasets, such as those representing vegetation and landcover, have associated attribute tables. There are the usual value and count columns, but there are also often additional
fields that hold useful vegetation descriptions. These might include vegetation type, vegetation complex, landcover type etc. ERDAS Imagine raster files will have a .vat.dbf with these attributes. It would be incredibly useful to be able to open this attribute table as you can with a vector dataset.
