QGIS Application - Bug report #2054
OSM plugin: tags/values not deleted on upload

2009-11-06 07:45 AM - Dan Karran

Status:	Closed		
Priority:	Low		
Assignee:	Martin Dobias		
Category:	Python plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	OS X	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	12114

Description

When a tag is removed from a node in OSM and then uploaded, the uploader thinks there is a change to be made, and a new version of the OSM node is created, but the tag you deleted in QGIS does not get removed from the OSM node.

Also related, if you add a tag through QGIS, then remove it, and upload your changes, the tag still gets added to the OSM node.

See, e.g. http://www.openstreetmap.org/browse/node/283515072 where I added the addr:city tag by accident, removed it in QGIS and added an operator tag (v3 of OSM node). I subsequently tried to remove the operator tag (v4).
