

## QGIS Application - Bug report #20545

### GUI bug: Layer Properties -> Attributes Form

2018-11-19 09:23 AM - Todd Baldrige

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	OsX UI	
<b>Affected QGIS version:</b>	3.4.1	<b>Regression?:</b> No
<b>Operating System:</b>	macOS 10.13.6; macOS 10.11.4; Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 28365

**Description**

Selecting "Attributes Form" In Layer Properties immediately collapses the pane to icons only. Click again to resize the pane, and the pane disappears completely.

Cancel and reopen Layer Properties, and the left pane shows only icons. To expand the pane to reveal the icon names again, you must enter a value into the search field, which partially opens the pane. Next, cancel and re-open Layer Properties to expand the pane as normal.

Only "Attributes Form" in Layer Properties seems to exhibit this buggy behavior. Tested in Windows 10, macOS High Sierra, and also in macOS El Capitan in a virtual machine.
