

QGIS Application - Bug report #20560

Installer/Uninstaller does not exit when done (win7)

2018-11-20 11:03 AM - Pär Smårs

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Windows Package	
Affected QGIS version:	3.4.1	Regression?: No
Operating System:	Windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28380
Description		
<p>Have downloaded the latest 3.4.1.</p> <p>Installed to target folder B:\APS\QGIS.3.4.1 (because I don't like spaces in paths)</p> <p>After everything has been installed, the installer window still stays up, with every button inactive (grayed out).</p> <p>It creates a directory for the Start menu. And then it says:</p> <p>"S,,tt i disketten som innehåller kommandofilen" = "Insert the diskette that contains the command file"</p> <p>I then have to break out of the installer using black magic and a little dance around my desk, i.e., using the Task Manger.</p> <p>I hope this isn't the norm, although it has been for the last couple of versions.</p> <p>Nobody else installing to a different location? Is it because the system is in Swedish, although I run it in English mode?</p>
