QGIS Application - Bug report #20585
When handle bad layers responded to with new datasource. The layer name does not update in the layers list.

2018-11-22 05:26 AM - Patrick Dunford

Status:	Open			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	3.4.1		**Regression?:**	No
Operating System:	Debian 9.5 / KDE		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	28405

Description

1. If the Handle Bay Layers dialog appears when opening a project.

2. Provide a new datasource for each layer using the Browse button.

3. Click OK, the layers will be loaded from the new datasources

4. The layer names in the project which have been changed to a new data source are not updated even though these names are based from the data source.
