It is still an issue with 3.4.2.

Experiencing issue on Mac OS 10.14 using 3.4.2 as well, can depress the run option but nothing happens. Have noticed the 'close' option next to 'run' is the only reason for crashing, when using the red close window button in top left it does not crash.

Have attached a crash report for the close button issue.

I've a colleague experiencing (version f10b62c), more than crash, the fact that batch processing does nothing... I suppose that this fix would solve the problem. I'll give more info after next nightly build.
