Affected QGIS version:	3.4.1	**Regression?:**	No	
Operating System:	Win 7 Pro SP1	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	28474	

Description

I have changed my QGIS language settings from system locale (Danish) to American English i QGIS 3.0. This has worked fine except for the Vector menu, which has split in two. I now have

1) a Vector menu containing 'Coordinate Capture', 'Check Geometries', 'DXF Import/Convert', 'Topology Checker' and 'Geoprocessing Tools'

2) a Vektor menu containing 'Geoprocessing-værktøjer' (Geoprocessing Tools), 'Geometri-værktøjer' (Geometry Tools), 'Analyse-værktøjer' (Analysis Tools), 'Datastyringsværktøjer' (Data Management Tools) and 'Forskningsværktøjer' (Research Tools)

The split menu has moved along to ver. 3.2, 3.4.1, 3.4.2 and is now also there in 2.18.26. Is there a way to change it to one all English menu without a complete reinstall of QGIS?
