Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	28488

Description

In some cases, there are several overlapping features, which makes selection or identifying a bit difficult.

In Mapinfo, you can hold CTRL and switch between those features (in single selection mode or identify tool).

Have the same problem with overlapping point features. It would be nice to be able to always see the selected points, even when there are point features "on top".

#2 - 2018-12-11 02:06 PM - Giovanni Manghi

I agree, this would be a much needed functionality.
