

QGIS Application - Bug report #20672

mysql 5.7.22 connection/feature viewing & editing

2018-11-29 11:40 AM - Gary Duckers

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	3.4.1	Regression?: Yes
Operating System:	Windows 10 64bit	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	No	Copied to github as #: 28492
Description I can no longer view features when connected to mysql 5.7.22 from QGIS 3.4.1 without a feature filter applied. Once applied I can no longer edit features. This database is my primary work database so this is a bit of a nightmare and severely affects our company workflow. Hopeful a fix can be made.

- Status changed from Open to Feedback

There have been fixes for mysql lately, maybe they are only in master, don't know for sure. If it works on 2.18 you should use that, is the official LTR release until Feb 2019.

#2 - 2019-03-09 11:07 AM - Giovanni Manghi

- Resolution set to no timely feedback

- Status changed from Feedback to Closed

Closing for lack of feedback.
