Pull Request or Patch supplied:		Resolution:	duplicate	
Easy fix?:	No	Copied to github as #: 12129		
Description		ŀ		

It would be useful to have a number of the table rows printed on the bottom of the table window/widget somewhere, so the user wouldn't have to scroll down to see how many rows the table has. Or even better, say which rows are displayed out of how many, eg. "rows: 25-33 of 215"
