History

#1 - 2018-12-03 10:35 AM - Alessandro Pasotti

- Status changed from Open to Feedback

Is this related to #20338 ?

Also, please attach a sample project to reproduce the issue and specify on which operating system you see this problem.

#2 - 2018-12-03 10:42 AM - Jürgen Fischer

- Related to Bug report #20338: Can not scroll through attribute list in dialog window when linking existing child features added

#3 - 2018-12-03 10:48 AM - Alessandro Pasotti

@Jürgen I'm not really sure it's related: the dialog contains a different layout and scroll area in case of relations and child features but this issue does not mention any parent-child layer setup.

#4 - 2019-01-28 03:59 PM - Peter Petrik

Unable to replicate with QGIS 3.5 (master) on MacOS (user Nikolay may use Mac, see OS <https://issues.qgis.org/issues/15984> in related issue)

#5 - 2019-02-01 02:12 PM - Nikolay Lebedev

- File noscroll.zip added

This happens when you switch form type from Auto-generated to Drag-n-Drop designer.
Attached video with this issue.

#6 - 2019-03-09 10:53 AM - Giovanni Manghi

- Affected QGIS version changed from 3.4.2 to 3.6.0

- Status changed from Feedback to Open

Still true on 3.6
