

QGIS Application - Feature request #2071

Anchor Choice for symbols

2009-11-09 01:39 AM - Andreas Neumann

Status:	Closed	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:	Symbolology	
Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 12131
Description		
<p>For SVG symbols (later potentially also truetype symbols) it would be great if one could select an anchor point:</p> <ul style="list-style-type: none">- center (default)- top-left- top-center- top-right- right- bottom-right- bottom-center- bottom-left- left <p>The user should have a GUI where he can select the anchor point (similar to the positioning dialogue in the print composer)</p>

the arbitrary offset part is already implemented in the new symbology. The anchor points would only be an additional convenience. I personally could also live with the existing solution - others may want to have the predefined anchor points - but it would be good to have both: the anchor points and the arbitrary offsets as they exist now.

#2 - 2011-12-16 01:58 PM - Giovanni Manghi

- Target version changed from Version 1.7.0 to Version 1.7.4

#3 - 2012-04-15 10:12 AM - Giovanni Manghi

- Target version changed from Version 1.7.4 to Version 2.0.0

#4 - 2012-10-06 02:34 AM - Pirmin Kalberer

- Target version changed from Version 2.0.0 to Future Release - Nice to have

#5 - 2014-03-03 07:07 AM - Andreas Neumann

- *Pull Request or Patch supplied set to No*
- *Status changed from Open to Closed*

This is now implemented in QGIS 2.2
