

QGIS Application - Feature request #20811

Add ability to do a manual full refresh of all HTML Frames in a Layout, including linked CSS.

2018-12-14 02:58 PM - Jay Cummins

Status:	Open	Resolution: Copied to github as #: 28630
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>In a layout, linked CSS files in an HTML frame are not reloaded when the Refresh HTML button is pressed.</p> <p>It would be extremely useful to be able to refresh all HTML elements in a layout, either by providing a full refresh from the View menu. Or by including full HTML refresh, including re-load of any linked CSS in the HTML, into the already present View  Refresh menu item.</p> <p>There are some imperfect workarounds here: https://gis.stackexchange.com/questions/305996/how-to-refresh-the-html-including-the-linked-css-for-a-qgis-html-frame</p>
