

QGIS Application - Bug report #20814

Computer temporarily freezes (hangs-up) during file open/save operations

2018-12-14 08:11 PM - Mark Thomasson

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	3.4.2	Regression?: No
Operating System:	macOS Mojave	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 28633
Description I am running QGIS 3.4.2 on a MacBook Pro (2016) running macOS Mojave (10.14.2). Every time I try to open or save a file, my computer hangs-up for 10-15 seconds waiting for the file open/close window to open. Subsequently, if I open a folder in the window, the computer will hang-up again for 10-15 seconds until that folder opens. This happens whether I am opening a file (project, SHP file, CSV file, etc) or saving one. It does not happen if I drag a file from Finder into the QGIS project window. It does not happen in other applications, just QGIS.
