QGIS Application - Feature request #20849
Give proper layer names for ProcessingAlgorithms output layers

2018-12-19 03:49 PM - Andreas Rabe

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Processing/GUI		
Pull Request or Patch supplied:	No	**Resolution:**	duplicate
Easy fix?:	No	**Copied to github as #:**	28668

Description

For a fresh QGIS installation, output layer names are given by the algorithm, e.g. **"Polygons from lines"**, even if a proper filename was specified.

Request:

1. delete the **"Use filename as layer name"** option in the settings OR at least activate it as default

2. behavior would be:
- If temporary file path is used --> use algorithm default output layer name
- If user-defined path is used --> use filename
