- Priority changed from Normal to High
- Category changed from Attribute table to Field calculator
- Status changed from Open to Feedback

Please:

try with a clean profile

if it does not help then attach the problematic vector as also indicate what column is to update and the expression used

Tried with a new project yesterday, it looks like happened when updating field value as same as another existing field. But the issue is not regularly happened, I have to wait several seconds first and then click OK button in field calculator.
