Category:	Vectors			
Affected QGIS version:	3.4.3		**Regression?:**	No
Operating System:	Windows 10		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	duplicate
Crashes QGIS or corrupts data:			**Copied to github as #:**	28717

Description

So this bug only happens in QGIS on Windows (osgeo4w installer) and not on Linux/Mac.

I have a service I'm retrieving from my fulcrum account: https://web.fulcrumapp.com/shares/a7ebbd207e74d371.geojson and it adds normally in Linux. On windows (osgeo4w installer) it fails to add with a "invalid data source". If I check the ogr log I get a "WARNING Cannot open https://web.fulcrumapp.com/shares/a7ebbd207e74d371.geojson.(SSL certificate problem: self signed certificate in certificate chain)".

I can retrieve the data using ogr2ogr and place it into a postgis database (ogr2ogr -update -append -t_srs EPSG:2274 -f "PostgreSQL" PG:"dbname='henrycounty911' active_schema=hc911 host='gis4' port='5432' user='rjhale' password='passwd' " -nln hc911.addresspoints https://web.fulcrumapp.com/shares/a7ebbd207e74d371.geojson)

I've also noticed on windows there are two entries for Geojson under protocol for Vector (I've included screeenshot)

Thanks for any and all help
