QGIS Application - Bug report #20902
Georeference does not start

2019-01-02 06:46 AM - Margaret Hawke

Status:	Closed		
Priority:	High		
Assignee:			
Category:	C++ plugins/Georeferencer		
Affected QGIS version:	3.4.3	**Regression?:**	No
Operating System:	Windows 10	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	invalid
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	28721

Description

The georeference function does not work in the latest version of QGIS 3.4.3. It often did not open in the previous version, which made me wonder if it was something on my computer, but now does not open at all.

Thanks

Cannot replicate here with the same qgis version and platform. Please try with a new/clean profile.

It turns out that if you have multiple screens the georeference box can get lost on a screen that is set up in a different sequence. It was found after changing the order of the screen setup.
