

QGIS Application - Bug report #20929

QGIS not responding for very long time when using rectangle tools to edit Spatialite or OGC GeoPackage files

2019-01-07 10:59 AM - Giang Ngo

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	3.4.3	Regression?: No
Operating System:	Ubuntu 18.04.1	Easy fix?: No
Pull Request or Patch supplied:		Resolution: no timely feedback
Crashes QGIS or corrupts data:		Copied to github as #: 28748
Description		
<p>I open Spatialite file with QGIS, enable editing, choose the "Add rectangle from extent" tool, draw a rectangle and QGIS is not responding right after I finish the rectangle.</p> <p>This case doesn't happen when I edit Shapefile.</p> <p>I am using QGIS Version: 3.4.3 - Madeira, Ubuntu 18.04.</p>
