Description

We have noticed that under windows (xp, vista, seven) the tool freezes/crashes qgis.

We are developing a project with simple polygon layers in a projected CRS (20790 and 20791), project crs 20790, otfr on, a raster loaded (in the 20790 crs).

Hope this can help tracking down the problem.

History

trunk, rev. 12096

#2 - 2009-11-25 12:56 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

A week later I cannot replicate the problem on the same platforms, in the same conditions and with the same data. Closing.
