

QGIS Application - Bug report #20972

Python error when running a Processing model

2019-01-11 01:21 PM - Magnus Nilsson

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Processing/Modeller	
Affected QGIS version:	3.4.3	Regression?: No
Operating System:	Windows 10, 64 bit	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28791
Description		
I am trying to use an online CSV file and plot its content as points using a Processing model. These steps causes a Python error: 1) Open a new model 2) Add the algorithm for downloading a file. I used https://earthquake.usgs.gov/earthquakes/feed/v1.0/summary/4.5_day.csv. 3) Add the algorithm for creating points from a table and configure it 4) Run the model 5) I now get this error message: Traceback (most recent call last): File "C:/PROGRA~1/GIS/QGIS/apps/qgis/.python/plugins\processing\algs\qgis\PointsLayerFromTable.py", line 91, in processAlgorithm raise QgsProcessingException(self.invalidSourceError(parameters, self.INPUT)) _core.QgsProcessingException: Kunde inte läsa in källager för INPUT: C:/Users/Magnus/AppData/Local/Temp/processing_fa76c51163e14b998c7ffcb4867abf80/980f76d9052042cd8525137ae9ede68f/OUTPUT.file PUT.file ej hittad Ett fel uppstod vid körning av Skapa punktlager från tabell Ett fel uppstod vid körning av Skapa punktlager från tabell Beräkningen misslyckades efter 0.38 sekunder I expected the data from the download algorithm to be available for other algorithms. Is this incorrect or is this a bug?		

History

#1 - 2019-01-11 03:38 PM - Giovanni Manghi

- Status changed from Open to Feedback

Please attach the model and the necessary data.

#2 - 2019-01-11 03:45 PM - Magnus Nilsson

- File CSV from web.model3 added

Model attached

- Status changed from Feedback to Open

#4 - 2019-01-25 09:38 PM - Alexis Roy-L

Have you tried providing a file name to the downloader, I'm not sure if the file can be properly set in memory and converted to an output.
