Description		
I set default value as: <pre>map_to_hstore(map('field1', 'value1', 'field2', 'value2'))</pre> but it assigns nothing (null/empty). But if I check "apply default value on update" and I change another field value, and save layer, the default value is assigned.

Using map('field1', 'value1', 'field2', 'value2') instead.

Sorry for in inconveniences.
