

QGIS Application - Feature request #20995

Control 'Symbol Levels' at the 'Group' level

2019-01-14 03:44 PM - Charley Glynn

Status:	Open	Resolution: Copied to github as #: 28814
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>This is one feature that works well in ArcMap - the ability to control symbol levels at the group level.</p> <p>As an example, this enables me to group various road layers and control their draw order holistically, rather than individually.</p> <p>Please see the attached image as an example of this functionality in ArcMap 10.6.1.</p> <p>Cheers</p> <p>Charley</p>
