<b>Description</b>	
<p>Hi,</p> <p>QgisInterface implement actionVertexTool wich trigger =&gt; vertex tool (all layer).</p> <p>I can't find the action in the API that trigger the vertex tool for current layer.</p> <p>Could you add the action that trigger =&gt; vertex tool (current layer)?</p> <p>My plugin needs to trigger the vertex tool... for the current layer. This was the behavior in qgis 2.18. Now, triggering the vertex tool for all layer could lead the user to undesired modification...</p> <p>thank you,</p>
