## QGIS Application - Bug report #21035 Export project to dxf symbol size

2019-01-19 10:59 PM - Matjaž Mori

Status: Open Priority: Normal

Assignee:

 Category:
 DXF export

 Affected QGIS version:3.5(master)
 Regression?:
 No

 Operating System:
 Windows 7
 Easy fix?:
 No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corru**pts** data: Copied to github as #: 28854

## Description

When exporting project, point symbols sizes not affected by change of symbology scale.

Exported symbol sizes in dxf always seem to be in meters no matter what scale is set on export or what units are set for symbol size in layer properties.
