

QGIS Application - Bug report #21040

Styles listed as layers

2019-01-20 12:42 PM - Jonathan Moules

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WMS	
Affected QGIS version:	3.4.3	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28859
Description		
This WMS: http://ogc.geo-ide.developpement-durable.gouv.fr/wxs?map=%2Fopt%2Fdata%2Fcarto%2Fgeoide-catalogue%2F1.4%2Forg_38102%2F3f11f0-91c9-479a-b748-ed1098603e91.internet.map&#38;version=1.3.0 If I connect to this, I see a layer with an ID of 9 that has a "name" of "default" and a "title" of default. But if you look in the GetCap reply for this service, this isn't a layer, it's a style. So surely it should not be listed as a layer?
