

QGIS Application - Bug report #21041

More clarity on layers versus styles

2019-01-20 12:49 PM - Jonathan Moules

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WMS	
Affected QGIS version:	3.4.3	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28860
Description		
This WMS: http://ogc.geo-ide.developpement-durable.gouv.fr/wxs?map=%2Fopt%2Fdata%2Fcarto%2Fgeoide-catalogue%2F1.4%2Forg_38102%2F2f3f11f0-91c9-479a-b748-ed1098603e91.internet.map&#38;version=1.3.0 If you go all the way down to opening ID 7/8, you see layers named/titled: "default" and "inspire_common:dEFAULT" - but neither of these is layers, they're styles. But they're represented here as though they're layers. Including styles in this fashion only confuses potentially already very confusing layer lists. (for example - try figuring out what's a layer and what's a style in this getcap: http://ags-sdi-public.jrc.ec.europa.eu/arcgis/services/world-release4-ETRS89/MapServer/WMSServer?version=1.3.0)
