

QGIS Application - Bug report #2105

missing/wrong symbology configuration after loading a saved project

2009-11-16 12:48 PM - Giovanni Manghi

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Symbology	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 12165
Description		
Add a point layer and style it with a symbol and a new size in map units. Save the project, close qgis and then reopen it. The layer show with wrong symbol size, and in fact in the symbology tab the checkbox "in map units" is not selected, so the symbols shows in pixels. Moreover the focus in the "Point Symbol" window is not on the right symbol. Tested on qgis trunk on both linux and windows.

History

#1 - 2009-11-16 01:26 PM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

the map units part should be fixed in commit:6e3d7d69 (SVN r12152). The point symbol part is not reproducible here.
