<b>Affected QGIS version:</b>	3.4.0	<b>Regression?:</b> Yes
<b>Operating System:</b>		<b>Easy fix?:</b> Yes
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 28873
<b>Description</b>		
<p>The fields are populated with the field names from the selected layer or table. But if a file path is used, since the layer or table is not loaded, the fields are not populated, and cannot be selected.</p> <p>Solutions:</p> <ol style="list-style-type: none"><li>1) allow typing the field names in this case, not selecting from combobox</li><li>2) reading the selected file if possible and populate the combo boxes</li><li>3) do not allow files to be selected in this situation, only loaded layers or tables</li></ol> <p>up to qgis 2.18, 3) was the way this was implemented</p> <p>Setting this as high priority, since it was ok in QGIS 2.x</p>

Can you elaborate? It works ok for me. If a file path is selected the layer is transparently loaded in the background and used to populate the fields list.
