

QGIS Application - Bug report #21056

Cannot commit data from QGIS 3.4.2 to sql server table with trigger

2019-01-21 11:02 AM - Lars Ellebjerg

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider/MSSQL	
Affected QGIS version:	3.4.2	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28874
Description		
<p>I have an issue committing data to a table in SQL Server 2012 where there is an "after update" trigger.</p> <p>I get the error message " [Microsoft][ODBC SQL Server Driver][SQL Server]The target table 'dbo.vinterrydning_sti' of the DML statement cannot have any enabled triggers if the statement contains an OUTPUT clause without INTO clause. [Microsoft][ODBC SQL Server Driver][SQL Server]Statement(s) could not be prepared."</p> <p>I can update the same data without any difficulties in QGIS 2.18.</p> <p>Best regards Lars Ellebjerg</p>
