

QGIS Application - Bug report #21064

KML export fail QGIS crash

2019-01-22 12:23 AM - Mark Thomas

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Vectors	
Affected QGIS version:	3.4.4	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 28882
Description		
<p>Loaded a fairly large GIS Geodatabase and attempted to export the whole and partial set as KML. QGIS consistently gets to 100% but then hangs leaving a large but invalid KML file as a result (1.5 GB approx in largest case) Try http://geohub.lacity.org/datasets/813fcefde1f64b209103107b26a8909f_0</p>
