

QGIS Application - Feature request #21074

Add log scale option to histogram plot in the feature symbology 'Graduated' editor.

2019-01-23 12:53 AM - Matthew Bodnar

Status:	Open	Resolution: Copied to github as #: 28892
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Most of my data is not Gaussian, it tends to have a background distribution and I have to evaluate the 90th percentile or the high outliers.</p> <p>The current linear scale of the histogram makes this rather tricky as I see most of the data as a tiny bar on the left side.</p> <p>I hope adding a log-scale option is not too difficult.</p> <p>The attached graphic illustrates the problem with the linear-only, it shows my 14,000 sample database with gold concentration.</p>
