

QGIS Application - Feature request #21094

Integrate Basic Auth

2019-01-25 11:54 AM - Giovanni Allegri

Status:	Open	
Priority:	Normal	
Assignee:	Tim Sutton	
Category:	Data Provider/GeoNode	
Pull Request or Patch supplied:	No	Resolution:
Easy fix?:	No	Copied to github as #: 28912
Description		
<p>Our latest commits on GeoNode master introduce the support for Basic Auth (beside token based auth for Geoserver) for the OWS services.</p> <p>WMS/WFS/WCS links returned by the API already accounts for proxied requests, which use the AUTHORIZATION header if set.</p> <p>The UI for the GeoNode connection management should integrate the same authentication manager window used for the OGC layers connections.</p>
