Description		
I got this problem with both 64 and 32 bits version. Tried to reinstall SIP. Tried to install several python packages. I also use Anaconda. I searched online and found several similar error, didn't managed to fixed it. I installed QGIS 3.0.1 and it started without any error. Since I spent already something like 4H trying to get QGIS work, I'll just keep working with version 3.0.1 but I wanted to repport the error? First Error window : Couldn't load SIP module. Python support will be disabled.
